Universal Allison DOC Tester Diagnostyczny Allison Transmission Diagnostyka Serwis Naprawa

Cena	**9 200,00 zł**

Opis produktu

Universal Allison DOC® + NEXIQ USB-LINK 2 KIT (RP1210) + OBD2 Adapter + 6-pin/9-pin Deutsch adapter

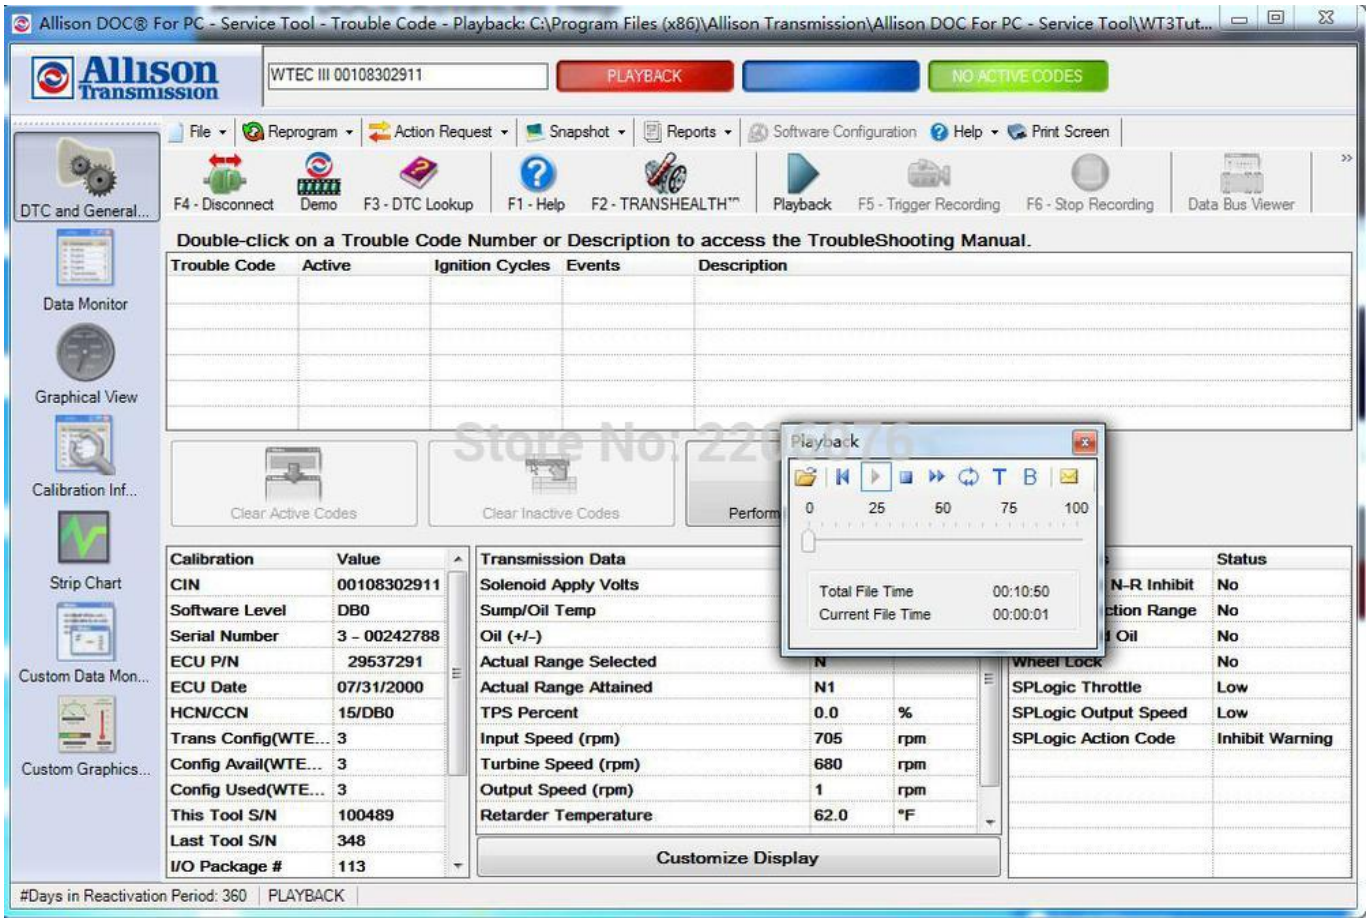

Kompletna diagnostyka Allison Transmission

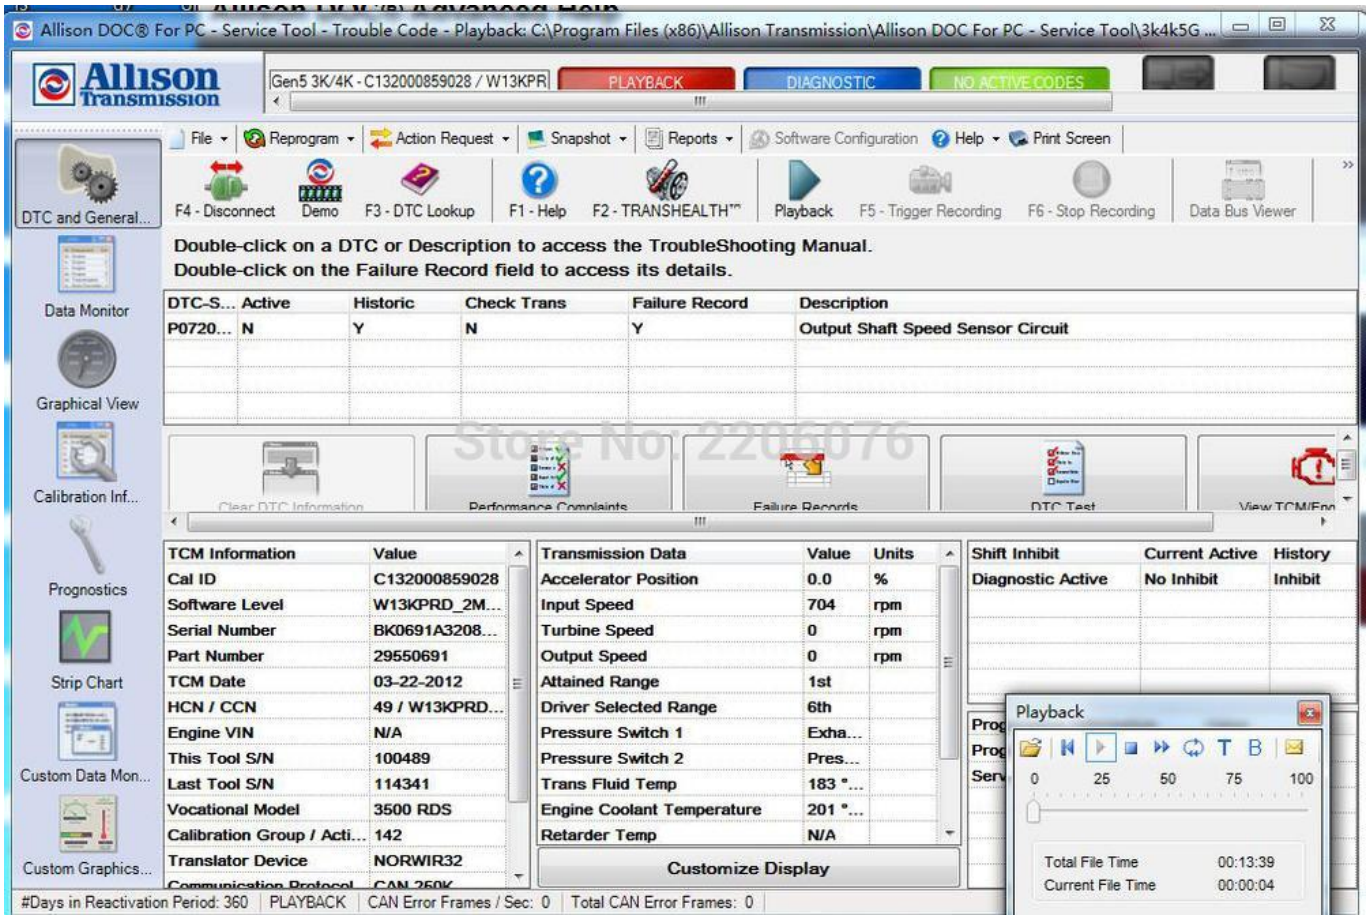

***Universal Allison DOC® for PC* product combines Service Tool, H 40/50 P and Tool for Fleets**.

Allison DOC® (Diagnostic Optimized Connection) For PC – Service Tool is a diagnostic system designed for use with Allison's 3000/4000 Product Families transmissions, 1000/2000 Product Families transmissions, and transmissions using CEC3/CEC2/CEC1 controls. This PC based diagnostic program is capable of communicating with Allison 4th Generation Control System Module TCMs (1000/2000, 3000/4000, and CEC3), WTEC II and WTEC III Electronic Control Units (ECU), 1000/2000 (Allison Pre-4th Generation Controls) TCMs, CEC2, and CEC1 Electronic Control Units (ECU).

- Monitors 3000/4000 Product Families Transmission Control Module (TCM) data.
- Monitors 1000/2000 Product Families Transmission Control Module (TCM) data.
- Monitors CEC/CEC2/CEC3 Electronic Control Unit (ECU) data.
- Displays multiple transmission parameters.
- Reads engine faults.
- Displays a graphical instrument panel with analog and digital gauges.
- Displays a graphical strip chart.
- Records and plays back diagnostic sessions.
- Prints diagnostic reports.
- Reprograms selected TCM parameters.
- Security measures to control reprogramming TCM/ECU parameters.
- Integrated Help with training videos.
- DTC information with a direct link to 3000/4000 Troubleshooting Manuals.
- DTC information with a direct link to the 1000/2000 Troubleshooting Manuals.
- DTC information with a direct link to CEC 2 Troubleshooting Manuals.
- A demo mode using prerecorded data.
- SmartConnect for detecting the PC-to-vehicle translation device and communication link.
- Compliant with applicable TMC Recommended Practices, SAE and CE Standards.
- RP1210A compliant.
- Reprogramming and engineering TAC data enabled.
- Communication troubleshooting wizard for those cases where the tool is unable to connect to a control module.

Allison DOC® (Diagnostic Optimized Connection) For PC H 40/50 EP, is a diagnostic program designed for use with Allison's H 40/50 EP. This PC based diagnostic program is capable of reading from H 40/50 EP controllers using J1939 communication protocols.

- Monitors data from the hybrid PCM, Engine, DPIM, and Energy Storage System.
- Displays multiple transmission parameters.
- Displays a graphical instrument panel with analog and digital gauges.
- Displays a graphical strip chart.
- Records and plays back diagnostic sessions.
- Prints diagnostic reports.
- Reprograms selected PCM settings.
- Exports recorded battery voltages to a comma separated file.
- Exports user-selected data items to a comma separated file.
- A demo mode using prerecorded data.
- Compliant with applicable TMC Recommended Practices, SAE and CE Standards.
- RP1210A compliant.

Zestaw zawiera:
